Ontrack® DataAdvisor™

Consolidated and easy catalogue management of legacy backup tapes.

Ontrack® DataAdvisor™ provides a time and cost effective solution for managing your legacy backup tapes. Eliminate the need to maintain costly backup systems with an online catalogue to view your legacy tape libraries. Whether transitioning to a new backup software or consolidating tape archives, Ontrack DataAdvisor gives you full visibility of your archived data for analysis or restore.
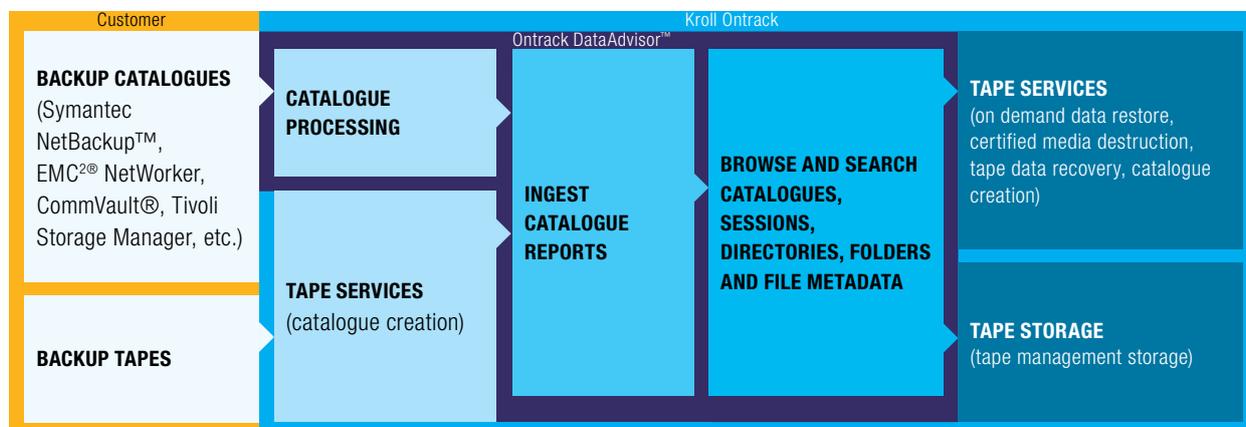

Benefits

- Full knowledge of information contained on legacy backups
  - Know what data exists in your enterprise and where it resides
  - Make informed decisions around the data you need to retrieve and migrate
  - Know what data needs to be kept for the business, litigation and compliance
  - Manage your tape library efficiently and dispose of unneeded data
- On-demand data restoration
  - Quickly access specific data needed for compliance, investigations and litigation
- Reduce the cost, time and risk of maintaining unnecessary legacy backup systems
  - Phase out and decommission legacy systems and reduce the risks associated with improperly storing or destroying information
  - Lower information risk at an enterprise level

Features

- Consolidate legacy backup catalogues from various systems and media into a single and easy-to-view inventory
- Easy to use interface to quickly search and browse sessions within a catalogue
- Easily generate catalogue reports
- Hosted catalogues in a secured environment
- Access Ontrack DataAdvisor online with a personal and secured customer login

How it works

- We help you collect catalogues from your backup server or create them from your loose tapes

- Catalogues are ingested into Ontrack DataAdvisor

- Review your backup catalogue online with Ontrack DataAdvisor to create restore requests
