

## DataAdvisor

### Consolidated and easy catalogue management of legacy backup tapes.

DataAdvisor provides a time and cost effective solution for managing your legacy backup tapes. DataAdvisor eliminates the need to maintain unnecessary backup systems and offers an online catalogue view for your legacy tape libraries. When transitioning to a new backup software or consolidating tape archives, DataAdvisor allows you to fully understand your archived data.

### Features

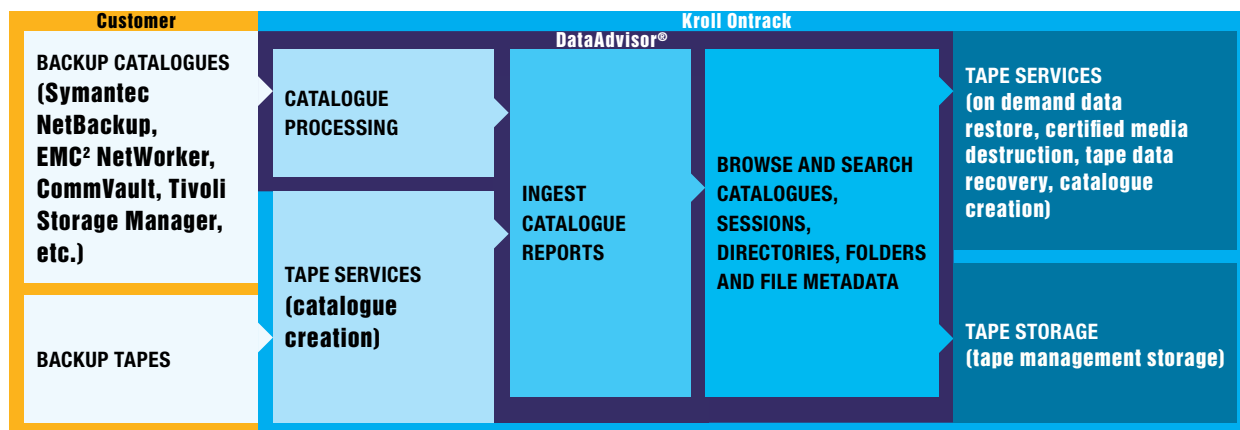

- Consolidate legacy backup catalogues from various systems and media into a single and easy-to-view inventory
- Quickly search and browse catalogues, sessions, directories, folders and file metadata
- Easily search and navigate catalogue reports
- Hosted in a secure environment
- Customer access online to DataAdvisor with a personal and secure login

### Benefits

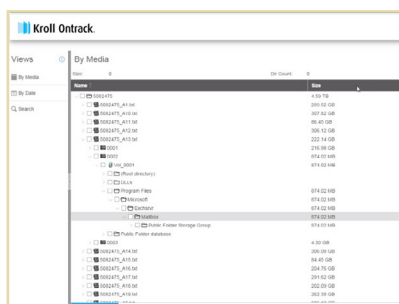

- Full knowledge of information contained on legacy backups
  - You know what data exists in your enterprise and where it resides
  - You make informed decisions around the data you need to retrieve and migrate
  - You know what data needs to be kept for the business, litigation and compliance, and dispose of data no longer needed
- Reduce the cost, time and risk of maintaining unnecessary legacy backup systems
  - You can phase out and decommission legacy systems and reduce the risks associated with improperly storing or destroying information
  - You have quick access to the specific data needed for compliance, investigations and litigation
  - You can better address information risk at enterprise level

## How it works

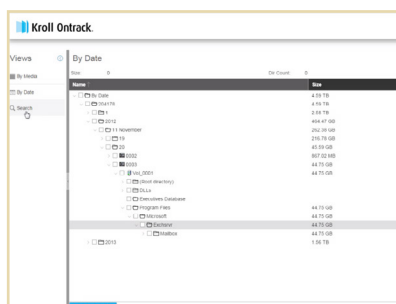

- Your catalogues are created by Kroll Ontrack or supplied to Kroll Ontrack
- They are ingested into DataAdvisor
- You can easily view the folder hierarchy of catalogues (media, session, directory, date, file name), search and browse folders
